

CAR WASH

Rocket Express Car Wash

We have worked with this developer previously and had the pleasure of helping to design another landscape for Rocket Express in a different location. We utilized the same style of planting and layout to create a consistent look for the franchise. The main concern with this car wash as well as others was maintaining the views into the property to maximize marketing. Our design was to utilize low growing shrubs with color massing to excentuate the landscaping on a lower scale.

Magic Car Wash

Created pops of color with hardy plants and provided excellent views of each car wash from the road.

Papa's Car Wash

Just as other car washes, views to the building were the most important aspect to the design. Our approach to this project was to incorporate grasses of many types. The grasses complimented the architectural materials and created a meadow feel to the landscape. Near the main road, we incorporated different rock types that became a dry streambed along the building.
