

Residential

Winning Design

Client needs are our first priority. The clients for this project needed spaces that could be used and enjoyed during different seasons, times of the day, and weather conditions. Our creative design meets those needs while also looking incredible. This stately home was featured during the 2025 Magic Valley Parade of Homes where it won Best Landscape in the Luxury Tier.

A Backyard With A View

This home's backyard overlooks the stunning Snake River Canyon. Our project objectives were to give the homeowners places where they could enjoy the view year-round. Canyon winds can be an issue, so a sunken firepit off the back patio offers protection and warmth from the winds as well as privacy from the public trail that runs along the canyon rim. A hot tub off the master bedroom allows easy access from the home in icy winter months, and a swim spa with its own elevated deck offers an excellent location to enjoy the view any time.
