Sunrise Garden

Our team had the honor of developing a design for a memorial garden located on the base. As we worked closely with officers and veterans, we developed needs and ideas that would be able to come to life through the landscape materials and site layout. Our main memorial will be incorporating the concept of shade and physical elements to highlight fallen soldiers. This gardens main use is to reflect on those who have given all for our freedoms and create peace and healing for current military and their families. The other side of the Gardens was to have “pods” that accentuate the five senses: touch, sight, sound, taste, and smell.
